

Is There a Better Way to Buy Your Next CAD Workstation?

We Think So.

HOLMAN'S
WorkStations
POWERLINE SERIES™

It's time to revolutionize the computer buying process. No more guessing. Anyone can give you a list of parts with various features and call it customization. But only one company can actually customize your system to fit your exact AEC and Autodesk needs. **Holman's of Nevada.**

Each **WorkStation** in our **PowerLine Series** is built to fit *your* specific needs, not everyone else's. We'll craft a **WorkStation** for the way you use your computer...whether you are modeling a basic or complex building, generating a 3D rendering, or designing a 5- acre Civil 3D parcel map.

Who better to design your computer system than the people who can custom build your hardware to meet your exact Autodesk software needs? Through a specially designed customization process, our experts will sit down with you and perform the **Holman's 6-Point Production Assessment** to discover your specific requirements.

Rest assured, every **PowerLine WorkStation** contains only the finest name brand components. And each computer is rigorously tested before delivery and comes with a 3-year on-site warranty.

Speed. Efficiency. Productivity. All built into every **Holman's PowerLine WorkStation.**

Don't believe us? Put us to the test. Take advantage of the **PowerLine Experience** and test drive a **Holman's PowerLine WorkStation** in your own office production environment. There's no cost, risk or obligation. We're sure you'll experience a noticeable improvement in productivity.

The revolution is taking place. Don't just buy a computer, buy *your* computer. For more information, call a Holman's advisor today.
